

As a courtesy to our community, Central County Fire Department is creating a Fuel Reduction/Landscaping contractor list that will be made available to the public. Local codes and ordinances require residents to provide fuel reduction and fire safe practices around their homes and CCFD would like to create a list of landscape contractors to help homeowners find the resources they need. This work may include varied terrain including flat land, hillsides, steep slopes with dense brush, grasses and tall trees.

Central County Fire Department staff is available for consultation upon request by homeowners and/or contractors and will give recommendations on fire safe fuel reduction practices for the property. Please visit our website for more information regarding fuel management. <http://www.ccfdonline.org/wui/>

To be added to our reference list you will need have a current and active C27 and/or D49 license issued by the California Contractors State License Board and have the appropriate city/town business license. These items will be verified prior to being added to the contractor reference list. Central County Fire Department does not endorse the listed companies, contractors, organizations, or the views they express or the products/services they offer. This list is available as a courtesy only. If you are interested in being added to the Fuel Reduction/Landscaping contractor reference list, please complete the form below and submit the completed form and a copy of your contractor license and business license.
